

## The solution for shopping areas and inner cities!

Many objects have been coated with our AW 4010 system. Because of this, illegal flyposting is in the past. CAS Nederland also offers AW 4090. This coating structure is more appealing and is the ideal solution for shopping areas and inner cities. Also, this coating has an improved anti-graffiti property, making graffiti removal even better.

**Anti-Flyposter Coating**

**The new way to deter illegal flyposting**

### Anti-Flyposter Coating

keep your city clean

*Traffic control boxes and public lighting cabinets, pump stations, waste containers, glass containers and many other items are suitable for this finer Anti-Flyposter Coating. A friendly, neat finish and a cleaner town centre are absolutely guaranteed with this.*

## Widely applicable

AW 4090 Anti-Flyposter System is a one-component, water-based fine structure coating in combination with medium oil alkyd resins. It has been developed for anti-flyposter, anti-sticker and anti-graffiti treatment of various closed surfaces. It is a 3-layer system with rapid application.

## Properties

- No adhesion of stickers and posters
- Graffiti is easy to remove
- Completely colour-fast
- High outdoor durability
- Very good chemical resistance
- Hard, scratch- and wear-resistant
- Permanent
- Fast working

## Why this choice?

This structure looks nicer than the normal AW 4010 and is the ideal solution for shopping areas and inner cities. This is due to its fine structure and sleek finish.
